

*The Anatomy of Violence:
The Growing Body of Evidence in Neurocriminology*

Professor Adrian Raine

Depts of Criminology, Psychiatry and Psychology, University of Pennsylvania,
and Visiting Fellow, Institute of Criminology, University of Cambridge

Institute of Criminology Public Seminar Series

Thursday 17th October 2013, 5.30pm

Seminar Room B3, Institute of Criminology,
Sidgwick Avenue, Cambridge, CB3 9DA

A drinks reception in the basement foyer will follow this seminar for attendees

There is a growing body of evidence documenting neurobiological bases to crime and violence. This seminar summarizes a recent book that highlights neurocriminology and explores its societal implications. If the neural circuitry underlying morality is compromised in offenders, how moral is it of us to punish prisoners as much as we do? Can biological risk factors help us better predict future violence? And can we improve the brain to reduce violence?

This seminar is free, and is open to all interested in attending, with no ticket required.
If you wish to be added to the seminar mailing list, please contact: Joanne Garner, on: jf225@cam.ac.uk
