

CLASSMARKS AND THEIR SUBJECTS

This guide gives you an alphabetical list of the classmarks used to classify books in the Radzinowicz Library of Criminology. If you turn the book over, it gives you the same information arranged alphabetically by subject heading.

Some classmarks have more than one subject attached. K4, for example, denotes social research methodology. Qualitative and quantitative research both come under this heading, so we've included them as subjects in this listing. The subject list is not exhaustive, though, so you may need to do some lateral thinking to find the area you're looking for.

The main subject headings and their classmarks are:

A	Philosophy	QOJ	Youth crime
AY	Statistics, data analysis	QOQ	Sex crime
G	UK Government publications	QOR	Violent crime
H	Medicine	QOTA	Terrorism
I	Psychology	QP	Penology
IDV	Violence and aggression	QPI, QPK	Prisons
IM	Psychiatry	QPT	Probation and parole
J	Education	RAG	Human Rights
K	Sociology	RP, RQ	Police
K4	Social research methodology	S	Jurisprudence and law
KCCN	Deviance	SO	Criminal law
KED	Race relations and racism	SQ	Criminal justice systems
P	Ethics	SQV	Sentencing
QO	Criminology	YVG	Crime in the media
QO65T	Master's Degree theses	ZK	Bibliography

The classmarks G and ZK (UK government publications and bibliographies) work in a different way to the others. These two are subdivided by the whole classification scheme. For example, QOK is the classmark for crime prevention; a government report on crime prevention will have the classmark G.QOK. A bibliography of crime prevention publications will have the classmark ZKQOK.

Types of book are denoted by number. These are:

1	Encyclopædia of a subject
11	Dictionary of a subject
3	History of a subject
4	Biography
